

Primary fibroblast (32F) derived Primed-hiPSC differentiation

Normalised relative gene expression (qPCR)

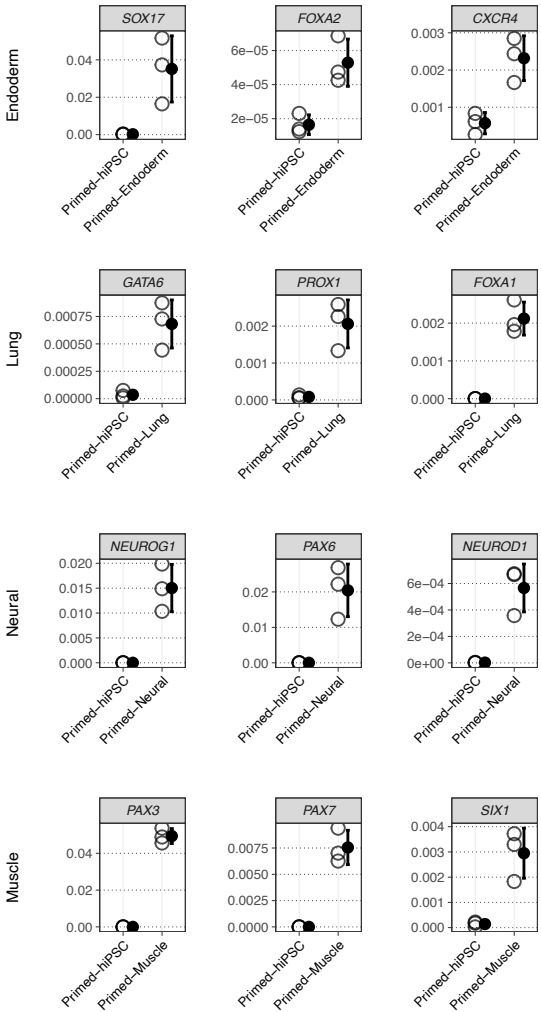

Mesenchymal stem cell (MSC) derived Primed-hiPSC differentiation

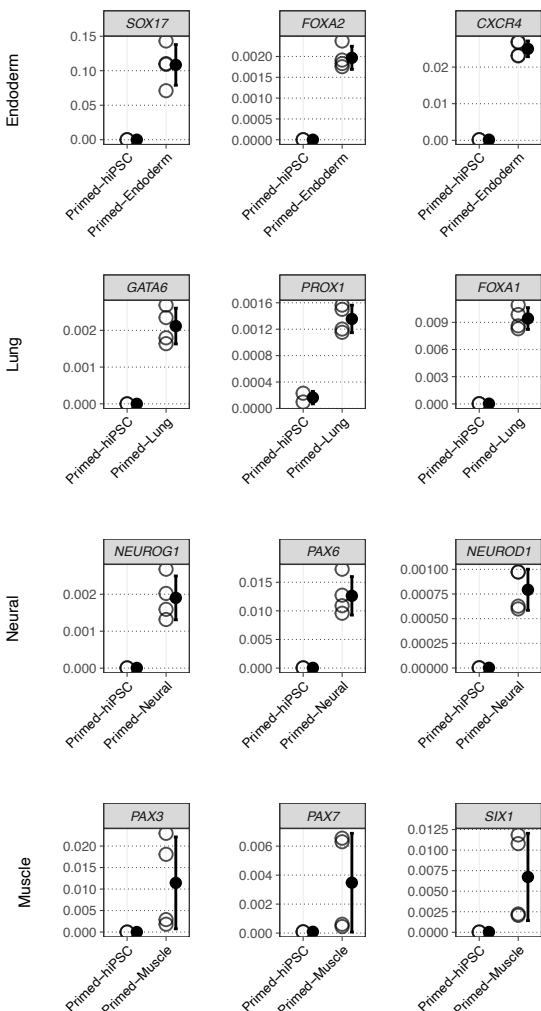

Keratinocyte (NHEK) derived Primed-hiPSC differentiation

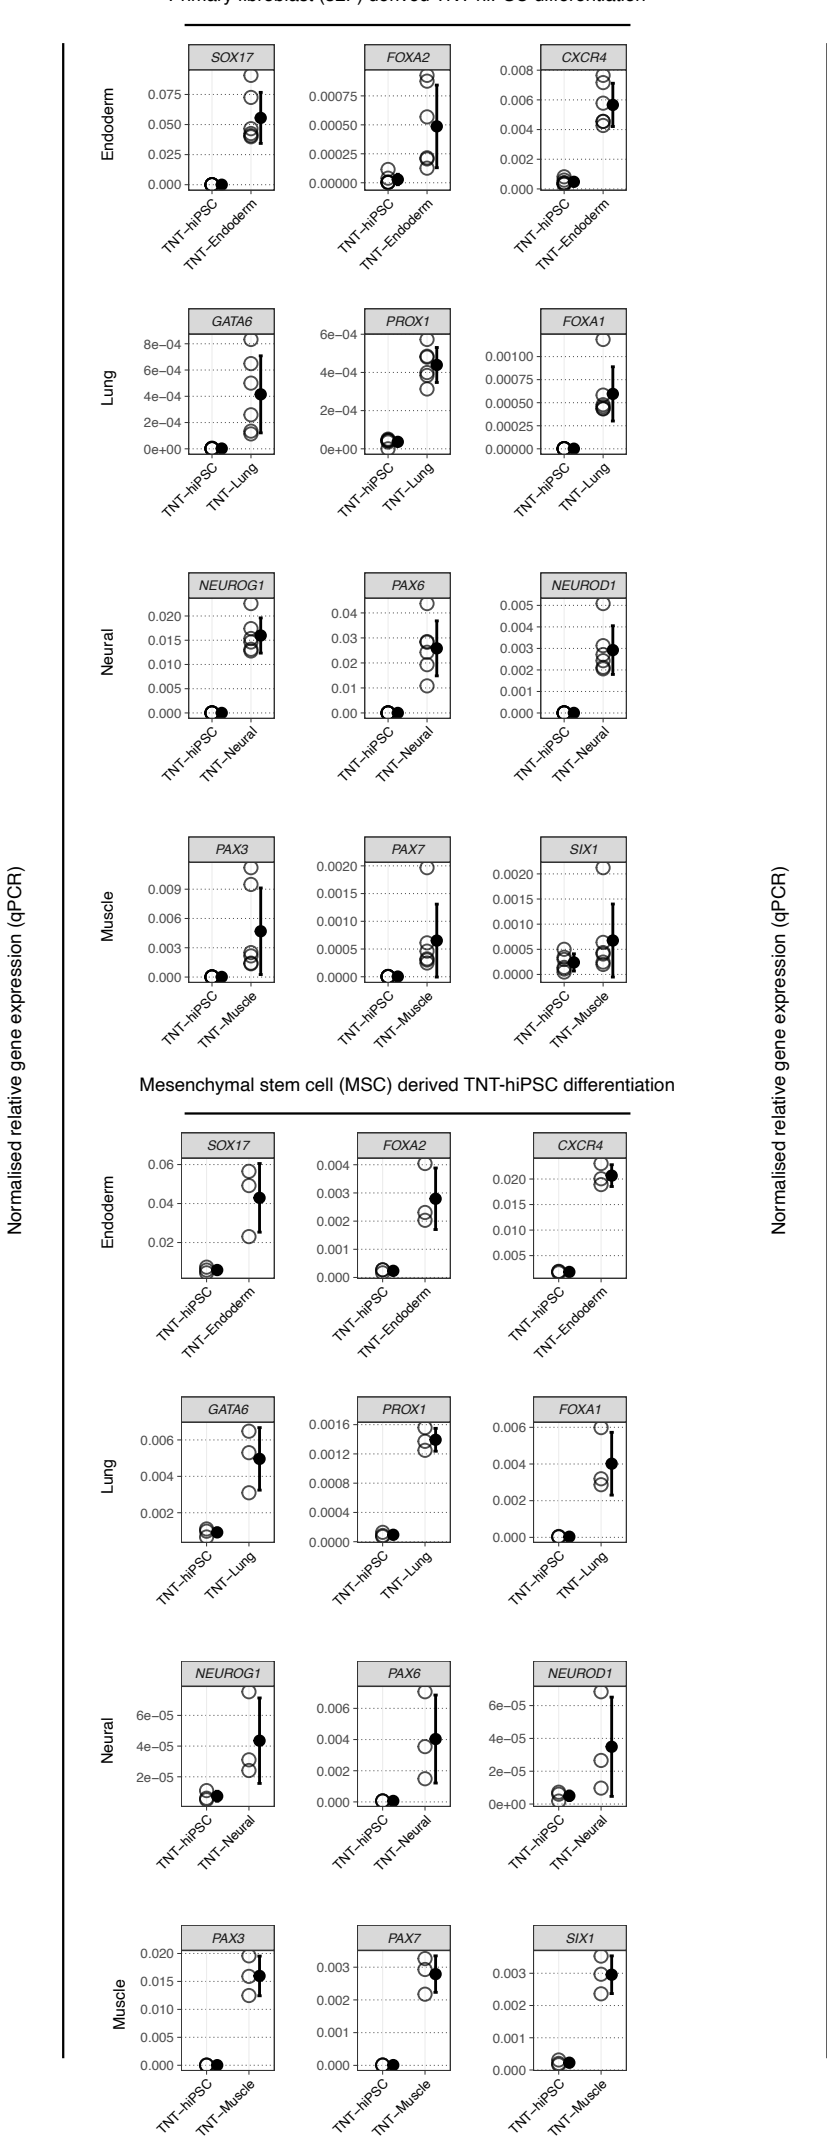

Normalised relative gene expression (qPCR)

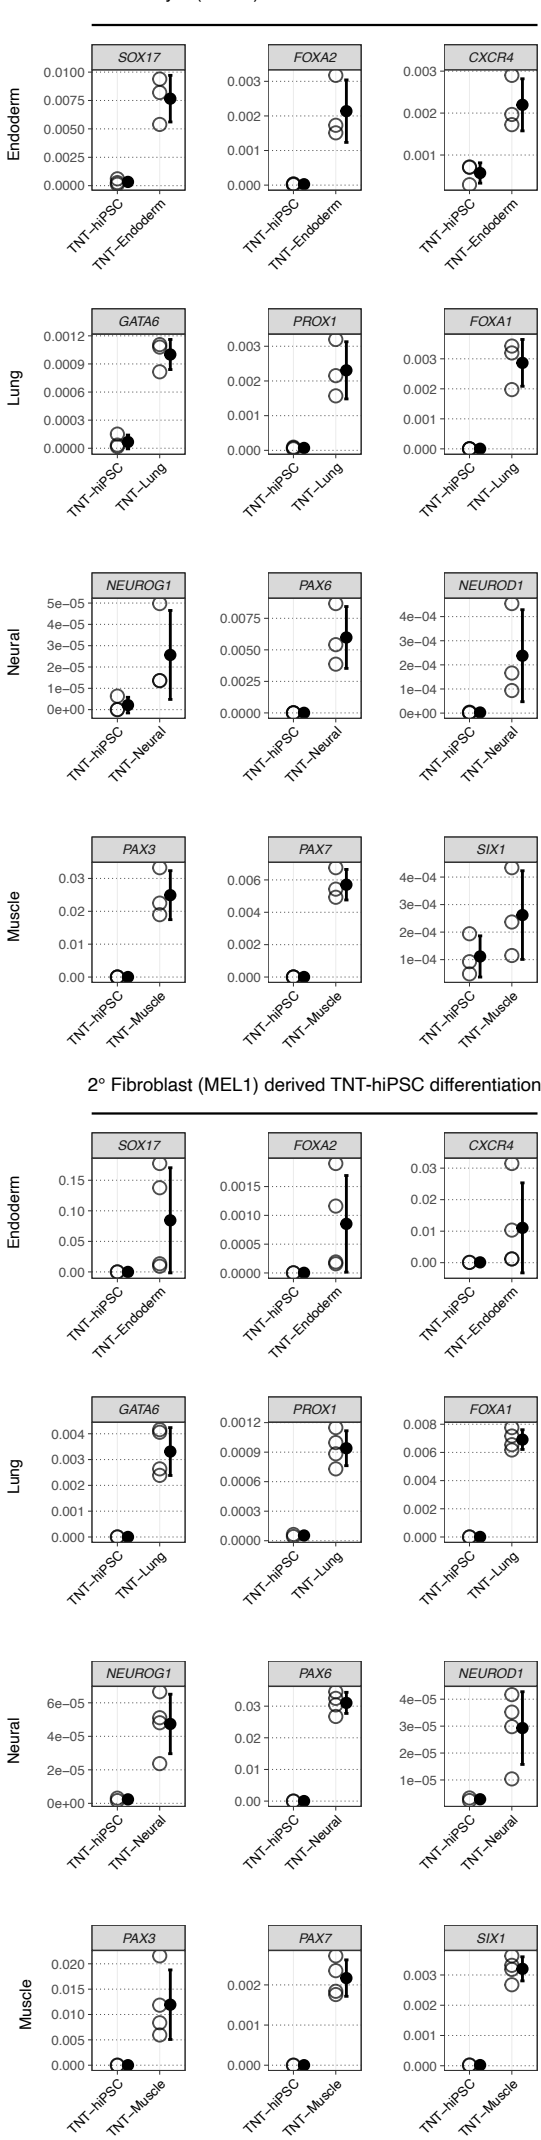

2° Fibroblast (MEL1) derived Primed-hiPSC differentiation

Primary fibroblast (32F) derived TNT-hiPSC differentiation

Keratinocyte (NHEK) derived TNT-hiPSC differentiation

hESC (MEL1) differentiation

Normalised relative gene expression (qPCR)
